

BIN Bank Identification
Numbers Database

BinBase.com Proposal

Thank you for your interest in BinBase.com product. We can provide a BIN Database Single License with 6 months of free updates for \$499US. The Single License allows you to use the database for your company's internal purposes only. We can also provide you a BIN Database Universal License with 24 months of free updates for \$999US. With a Universal License, you can use the database to create and sell access to your product derived from our database.

With either license, you may use the database for an unlimited time -- but to keep it up to date, you will want to add the annual \$199 subscription fee after your first 6 (24) months. You will receive updates at least four times each year.

We receive new BINs within 2 months after any changes in the BIN system. Country shifts are relatively rare, and we absolutely will reflect these facts in the database.

The BinBase.com database is not sold in parts; we offer only the complete database for sale. The database includes Visa, MasterCard, Amex, Diners Club, JCB, Discover, Solo, Laser, Switch, and Maestro cards with over 99 percent coverage. You can review the samples in [CSV](#) format.

You can review the database structure at <http://www.binbase.com/structure.html>

You can review the database data sheet at <http://www.binbase.com/datasheet.html>

You can download our demo lookup software at <http://www.binbase.com/software.html>

You will receive the complete database files as an email attachment within 24 hours after your purchase. Email sales@binbase.com if you have any questions.

Database Delivery

For security reasons, we do not allow download of our database; we sell the BIN database delivered to you by email as a .zip file. When you purchase a license, you receive the files in a fully ISO-compliant and semicolon-delimited format. *Initial updates are included at no charge*; we provide free updates for 6 or 24 months, depending on the license you purchase. After that initial period, updates will be provided to you upon request for a fee of \$199US annually. Database delivery package includes database in CSV and XML format, as well as BIN lookup software to perform quick filtering tasks on local Windows machine.
