

### About BinBase.com filtering and lookup software

---

BinBase.com provides handy software to perform quick filtering and bulk BIN lookup. Demo version comes with a small fraction of randomly selected records. Full version of this software package is delivered with both license types – Single and Universal.

### Downloading and running the application

---

Download package (binbase\_lookup\_demo.zip) contains the following files:

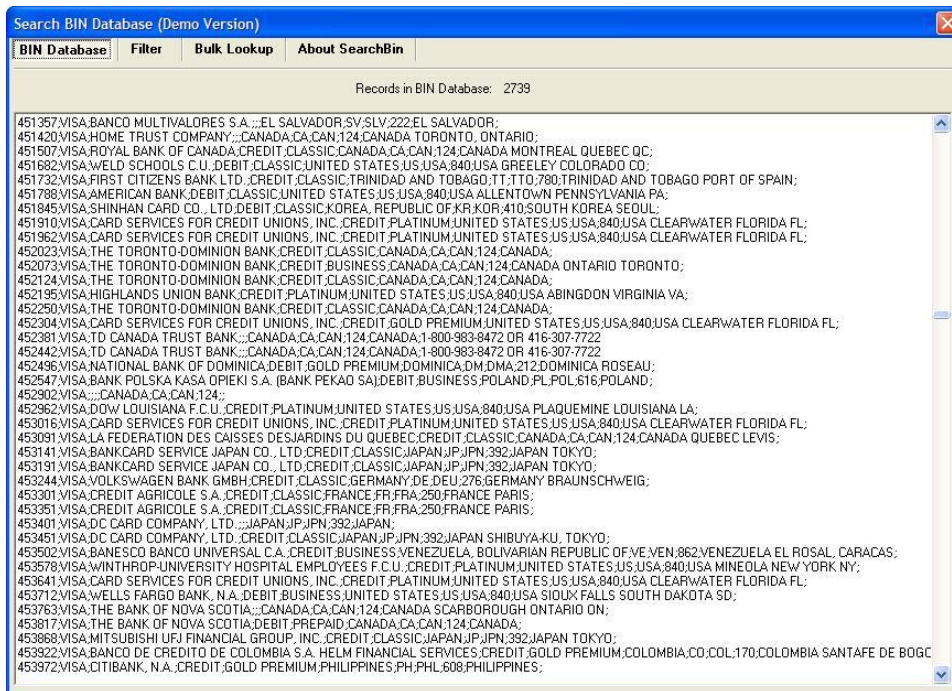

- SearchBin.exe
- bins\_iso\_demo.csv

Software doesn't require the installation. Unzip the binbase\_lookup\_demo.zip in one folder. Don't rename or alter contents of the test database (bins\_iso\_demo.csv) as it will prevent software from functioning.

### Operation

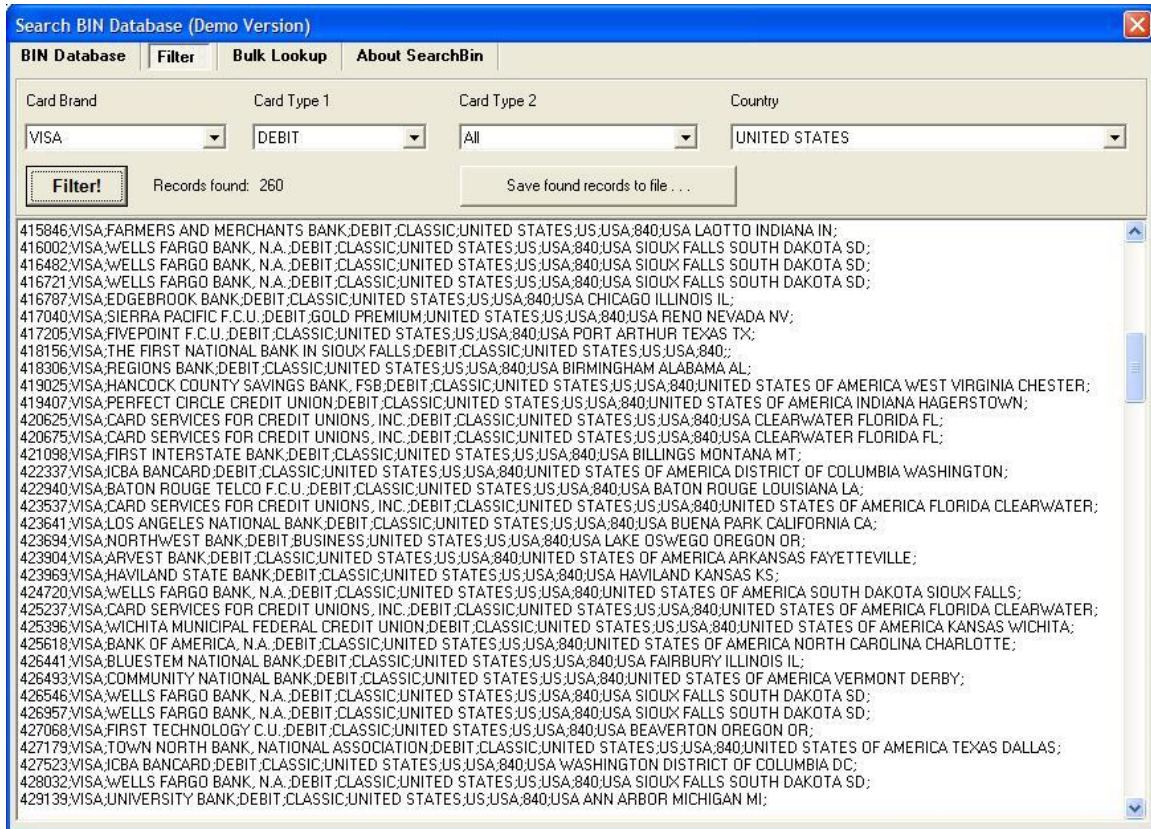

---

Run SearchBin.exe. The database will be loaded, and you will see the following screen displaying all available records:

To display all records that satisfy your filtering query, go to the **Filter** tab. Let's assume you wish to find all Visa debit records that belong to United States.

Set **Card Brand** to **VISA**, **Card Type 1** to **DEBIT**, **Country** to **UNITED STATES** and press **Filter!**. You will see the results as shown on the screen shot below, as well as the number of records satisfying your search criteria. If you wish, you may save the results to the file by pressing **Save found records to file . . .** button.

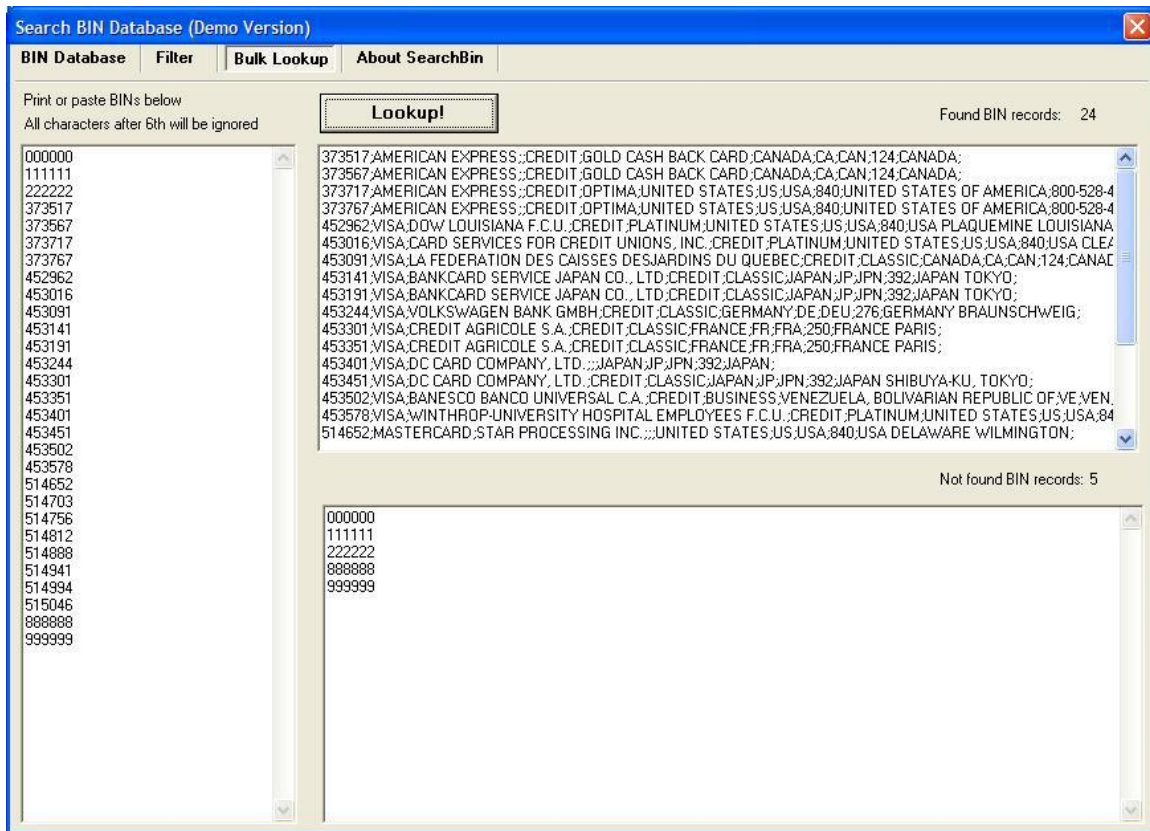

To perform bulk BIN lookup, go to the **Bulk Lookup** tab.

Enter or paste the list of BINs in the left panel and press **Lookup!**. One row should contain one BIN number. For your convenience first six characters will be stripped.

In the upper right panel you will see the list of found records, on the lower right panel you will see the list of records that were not found.

The screen shot below illustrates this process:
